A scenic photograph of a river with a forested island and a cloudy sky. The water is calm, reflecting the sky and the trees. The sky is filled with soft, white clouds, and the overall tone is peaceful and natural.

Cumberland County, NJ Data Book

2025

Data from the 2020 Decennial Census and
2019-2023 American Community Survey 5-year Estimates
Prepared by: Cumberland County Department of Planning, 2025

The statistics used in this document are derived from two Census Bureau Surveys, the 2020 Decennial Census and the American Community Survey. The Decennial Census numbers are the official count, whereas the American Community Survey data are estimates gathered over a 5-year period and released each year.

Decennial Census

The decennial census is the once-a-decade population and housing count of all 50 states, the District of Columbia, Puerto Rico, and the Island Areas. The results of the census determine the number of seats for each state in the U.S. House of Representatives and are used to draw congressional and state legislative districts. Federal agencies use the results to distribute more than \$675 billion in federal funds each year.

Thomas Jefferson directed the first decennial census in 1790. As required by the U.S. Constitution, a census has been taken every 10 years thereafter. In 1840, the Census Act authorized the establishment of a centralized Census Office. In 1902, the Census Office became a permanent organization within the Department of the Interior. A year later, it was renamed the Bureau of the Census and moved to the new Department of Commerce and Labor.

American Community Survey

The American Community Survey (ACS) is an ongoing survey that provides vital information on a yearly basis about our nation and its people. Information from the survey generates data that help determine how more than \$675 billion in federal and state funds are distributed each year.

Through the ACS, we know more about jobs and occupations, educational attainment, veterans, whether people own or rent their homes, and other topics. Public officials, planners, and entrepreneurs use this information to assess the past and plan the future. When you respond to the ACS, you are doing your part to help your community plan for hospitals and schools, support school lunch programs, improve emergency services, build bridges, and inform businesses looking to add jobs and expand to new markets, and more.

Decennial Census

- **Conducted every ten years**
- **Counts every person living in the 50 states, District of Columbia, and the five U.S. territories**
- **Asked a shorter set of questions, such as age, sex, race, Hispanic origin, and owner/renter status**
- **Provides an official count of the population, which determines congressional representation. Also provides critical data that lawmakers and many others use to provide daily services, products, and support for communities.**

American Community Survey

- **Conducted every month, every year**
- **Sent to a sample of addresses (about 3.5 million) in the 50 states, District of Columbia, and Puerto Rico**
- **Asks about topics not on the 2020 Census, such as education, employment, internet access, and transportation**
- **Provides current information to communities every year. It also provides local and national leaders with the information they need for programs, economic development, emergency management, and understanding local issues and conditions.**

A Brief Chronology of Colonial Cumberland County

In 1663, the territory of the American northeast was granted by King Charles II, to the Duke of York, the King's brother. This territory extended from the Delaware Bay to Eastern Maine. In 1675, New Jersey was divided into East and West Jersey. In 1682, West Jersey was divided into Burlington and Salem counties.

In 1748, Cumberland County was formed from the west side of Salem County. It was named in honor of the Duke of Cumberland. Cohansey Bridge (Bridgeton) was chosen as the county seat by popular vote. Six townships were also recognized: Greenwich, Cohansey, Hopewell, Stow Creek, Maurice River and Deerfield. In 1772, Cumberland County elected two representatives to the Colonial legislature. It previously had elected jointly with Salem.

In 1774, Patriots burned tea at Greenwich on Dec. 22, a group of patriots dressed as Native Americans seized British tea brought in by the brig Greyhound and burned it in protest against the British tax on tea. In 1775, The Plain Dealer, a manuscript newspaper said to be the first in New Jersey, was issued at Potter's Tavern, in Bridgeton. Cumberland County men went to war to fight in the Revolution against British tyranny. In 1776, The Declaration of Independence was read from the courthouse steps, the royal arms were burned and the county's Liberty Bell was rung.

In 1790 the first Federal Census was held. The Population in Cumberland County was 8,248.

Definitions

Average family size

A measure obtained by dividing the number of members of families by the total number of families (or family householders).

Average household size

A measure obtained by dividing the number of people in households by the total number of households (or householders).

Census tract

A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tracts nest within counties, and their boundaries normally follow visible features, but may follow legal geography boundaries and other non-visible features in some instances, Census tracts ideally contain about 4,000 people and 1,600 housing units.

Civilian employed / Employed

Employed includes all civilians 16 years old and over who were either (1) "at work" -- those who did any work at all during the reference week as paid employees, worked in their own business or profession, worked on their own farm, or worked 15 hours or more as unpaid workers on a family farm or in a family business; or (2) were "with a job but not at work" -- those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are people whose only activity consisted of work around the house or unpaid volunteer work for religious, charitable, and similar organizations; also excluded are people on active duty in the United States Armed Forces. The reference week is the calendar week preceding the date on which the respondents completed their questionnaires or were interviewed. This week may not be the same for all respondents.

Civilian noninstitutionalized population

All U.S. civilians not residing in institutional group quarters facilities such as correctional institutions, juvenile facilities, skilled nursing facilities, and other long-term care living arrangements.

Civilian Population

All U.S. residents not in the active-duty military.

Class of worker

All people over the age of 15 who have been employed at any time are asked to designate the type of work normally done or the work performed most regularly. Occupations and types of work are then broken down into the following 5 classes.

Private Wage and Salary Workers--Includes people who worked for wages, salary, commission, tips, pay-in-kind, or piece rates for a private-for-profit employer or a private-not-for-profit, tax-exempt, or charitable organization.

Self-employed people whose business was incorporated are included with private wage and salary workers because they are paid employees of their own companies. Some tabulations present data separately for these subcategories: "For profit," "Not-for-profit," and "Own business incorporated."

Government Workers--Includes people who are employees of any local, state, or federal governmental unit, regardless of the activity of the particular agency. For some tabulations, the data are presented separately for the three levels of government.

Self-Employed Workers--Includes people who worked for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm.

Educational attainment

Refers to the highest level of education completed in terms of the highest degree or the highest level of schooling completed.

Employment

Paid employment consists of full and part-time employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12. Included are employees on sick leave, holidays, and vacations; not included are proprietors and partners of unincorporated businesses.

Employment status

Employment status identifies those who 1) worked at any time during a

specific week; 2) were on temporary layoff and available for work; 3) did not work during the reference week but had jobs or businesses from which they were temporarily absent (excluding layoff); 4) did not work during the reference week but were looking for work during the last four weeks and were available to work during the reference week; and 5) were not in the labor force.

Family income

The sum of the income of all family members 15 years and older living in the household. Families are groups of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related subfamily members) are considered as members of one family.

Hispanic or Latino origin

Hispanic or Latino refers to a person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race.

This includes people who reported detailed Hispanic or Latino groups such as:

- Mexican
- Puerto Rican
- Cuban
- Dominican Republic

Central American (excludes Mexican)

- Costa Rican
- Guatemalan
- Honduran
- Nicaraguan
- Panamanian
- Salvadoran
- Other Central American

South American

- Argentinian
- Bolivian
- Chilean

- Colombian
- Ecuadorian
- Paraguayan
- Peruvian
- Uruguayan
- Venezuelan
- Other South American

Spaniard

All other Hispanic or Latino

Household

A household includes all the people who occupy a housing unit (such as a house or apartment) as their usual place of residence.

A household includes the related family members and all the unrelated people, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit such as partners or roomers, is also counted as a household. The count of households excludes group quarters.

There are two major categories of households, "family" and "nonfamily."

Household is a standard item in Census Bureau population tables.

Household income

The sum of the income of all people 15 years and older living in the household. A household includes related family members and all the unrelated people, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit, is also counted as a household.

Housing Unit

A house, an apartment, a mobile home or trailer, a group of rooms, or a single room occupied as separate living quarters, or if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building and which have direct access from outside the building or through a

common hall. For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible.

Householder

The person, or one of the people, in whose name the home is owned, being bought, or rented.

If there is no such person present, any household member 15 years old and over can serve as the householder.

Two types of householders are distinguished: a family householder and a nonfamily householder. A family householder is a householder living with one or more people related to him or her by birth, marriage, or adoption. The householder and all people in the household related to him are family members.

A nonfamily householder is a householder living alone or with nonrelatives only.

Language spoken at home

The language currently used by respondents at home, either "English only" or a non-English language which is used in addition to English or in place of English.

Labor force

The labor force includes all people classified in the civilian labor force, plus members of the U.S. Armed Forces (people on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard). The civilian labor force consists of people classified as employed or unemployed.

Marital status

Adults are generally classified by marital status as being married, never married, separated, divorced or widowed.

Mean

This measure represents an arithmetic average of a set of numbers. It is derived by dividing the sum of a group of numerical items by the total number of items in that group.

For example, mean income is the amount obtained by dividing the total income of a group by the number of units in that group. The means for households, families, and unrelated individuals are based on all households, families, and unrelated individuals, respectively. The means for people are based on people with income. For example, mean family income is obtained by dividing the total of all income reported by people 15 years and over in families by the total number of families.

Mean (Average) income

Mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households. For the various types of income, the means are based on households having those types of income.

Median Income

The median income divides the income distribution into two equal groups, one having incomes above the median, and other having incomes below the median.

Mortgage status

"Mortgage" refers to all forms of debt where the property is pledged as security for repayment of the debt, including deeds of trust, trust deed, contracts to purchase, land contracts, junior mortgages, and home equity loans.

Nonfamily household

A nonfamily household consists of a householder living alone (a one-person household) or where the householder shares the home only with people to whom he/she is not related (e.g., a roommate).

Not in labor force

Not in labor force includes all people 16 years old and over who are not classified as members of the labor force. This category consists mainly of students, housewives, retired workers, seasonal workers interviewed in an off season who were not looking for work, institutionalized people, and people doing only incidental unpaid family work (less than 15 hours during the reference week).

Occasional use

In the American Housing Survey, these are units held for weekend or other occasional use throughout the year. Second homes may be classified as occasional use or as seasonal.

Occupants per room

Obtained by dividing the number of people in each occupied housing unit by the number of rooms in the unit.

Owner-occupied housing unit

A housing unit is owner occupied if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for.

Per capita income

Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population.

Population density

Total population within a geographic entity (for example, United States, state, county, place) divided by the land area of that entity measured in square kilometers or square miles. Density is expressed as both "people per square kilometer" and "people per square mile" of land area.

Population estimates

The calculated number of people living in an area as of a specified point in time, usually July 1st. The estimated population is calculated using a component of change model that incorporates information on natural increase (births, deaths) and net migration (net domestic migration, net international migration) that has occurred in an area since the latest decennial census.

Poverty definition

Following the [Office of Management and Budget's \(OMB's\) Directive 14](#), the Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is in poverty. If the total income for a family or unrelated individual falls below the relevant poverty threshold, then the family (and every individual in it) or unrelated individual is considered in poverty.

Race

The data on race were derived from answers to the question on race. The U.S. Census Bureau collects race data in accordance with guidelines provided by the U.S. Office of Management and Budget (OMB), and these data are based on self-identification. The racial categories included in the census questionnaire generally reflect a social definition of race recognized in this country and not an attempt to define race biologically, anthropologically, or genetically. In addition, it is recognized that the categories of the race question include race and national origin or sociocultural groups. OMB requires that race data be collected for a minimum of five groups: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or other Pacific Islander. OMB permits the Census Bureau to also use a sixth category – Some Other Race. Respondents may report more than one race.

Renter-occupied housing unit

All occupied units which are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter-occupied.

School enrollment

Enrollment refers to being registered or listed as a student in an educational program leading to a high school diploma or college degree. This may be a public school or college, a private school or college, or home school.

In some surveys, the Census Bureau also asks about school "attendance," which is treated as equivalent to enrollment.

Selected monthly owner costs

Selected monthly owner costs are calculated from the sum of payment for mortgages, real estate taxes, various insurances, utilities, fuels, mobile home costs, and condominium fees. Listing the items separately improves accuracy and provides additional detail. When combined with income, a new item is created – Selected Monthly Owner Costs as a Percentage of Household Income. This item is used to measure housing affordability and excessive shelter costs. For example, many government agencies define excessive as costs that exceed 30 percent of household income.

Tenure

Refers to the distinction between owner-occupied and renter-occupied housing units.

Unemployed

All civilians 16 years old and over are classified as unemployed if they (1) were neither "at work" nor "with a job but not at work" during the reference week, and (2) were actively looking for work during the last 4 weeks, and (3) were available to accept a job. Also included as unemployed are civilians who did not work at all during the reference week, were waiting to be called back to a job from which they had been laid off, and were available for work except for temporary illness.

Unemployment rate

Represents the number of unemployed people as a percentage of the civilian labor force.

Units in structure

A structure is a separate building that either has open spaces on all sides or is separated from other structures by dividing walls that extend from ground to roof. In determining the number of units in a structure, all housing units, both occupied and vacant, are counted.

Vacancy Status

Unoccupied housing units are considered vacant. Vacancy status is determined by the terms under which the unit may be occupied, e.g., for rent, for sale, or for seasonal use only.

Vacant housing unit

A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by people who have a usual residence elsewhere are also classified as vacant.

Value

Value is the respondent's estimate of how much the property (house and lot, mobile home and lot, or condominium unit) would sell for if it were for sale. For vacant units, value was the price asked for the property.

Vehicles available

These data show the number of passenger cars, vans, and pickup or panel trucks of one-ton capacity or less kept at home and available for the use of household members.

Year structure built

The data on year structure built were obtained from both occupied and vacant housing units. Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. The data relate to the number of units built during the specified periods that were still in existence at the time of enumeration.

100-percent data

The phrase used to describe data from questions asked of all the population (100 percent).

In decennial censuses from 1960 to 2000, the Census Bureau used a "short" form to collect data from every household (100 percent) and a "long" form to collect additional data from a sample of the population. In 2000, the short form question asked about sex, age, date of birth, household relationships, race, Hispanic origins, and owner renter status.

The Census Bureau developed the American Community Survey(ACS) to collect long form data each year and Census.

1-Year Estimates

Estimates based on 1 year of American Community Survey (ACS) data. They are meant to reflect the characteristics of a geographic area over the entire 12 month period. They are published for geographic areas with a population of 65,000 or more.

5-Year Estimates

Estimates based on 5 years of [American Community Survey \(ACS\)](#) data. They reflect the characteristics of a geographic area over the entire 60 month period. They are published for geographic areas down to the block group level.
